

The ideal partner for your image

# About us

ALWAYS UPDATED ABOUT THE CHANGES AND INNOVATIONS IN OUR FIELD, SINCE 2003 WE CREATE BOOTHS AND EXHIBIT SPACES WITH A 360° APPROACH FOR SMALL, MEDIUM AND LARGE COMPANIES, FROM PLANNING TO PRODUCTION.

## What we do

**At Think to Link** we take care of fairs and events as well as retail, pop-up, exhibitions, museums and interior design projects. Starting from the brand study we dedicate ourselves to the idea conception, then to the production and the staging. Paying close attention to details, quality materials and the constant research of innovative solutions, we became the fundamental reference point for our customers in Italy and abroad.

Constantly informed about the latest trends in the world of design and architecture, **Think to Link** produces innovative booths with top quality materials, in line with the European regulations. Beside of assembling and dismantling, we also manage transportation and storage. Moreover, we assist our customers in the preparation of the events, with the bureaucratic and administrative aspects, providing a fundamental service for presenting their companies at the best at any national and international exhibition. Our expertise and know-how are accompanying our customers step-by-step, granting them the best exhibition experience!

# Video production & editing

Among our services we can handle also video production, formats creation, technical and/or creative direction and delivery on all platforms (Twitch, Facebook, IGTV, Vimeo, Zoom, Zoom Webinar etc). We can produce and integrate company video infrastructures, including the acoustic, electrical and structural planning, the audio-video materials, as well as the development of management softwares or the integration with existing ones, including periodical software and hardware updates and technical assistance.
